

What Is the Digestive System?

Label the types of nutrients shown in the chart below. Select your answer from the terms: *carbohydrates, fats, proteins, or vitamins and minerals.* (page 33)

8. _____ 9. _____ 10. _____ 11. _____

Write *true* if the statement is true and *false* if the statement is false.

- _____ 12. The stomach is a muscular organ that squeezes the food and mixes it with digestive juices that contain enzymes and an acid. (page A35)
- _____ 13. Food leaves the stomach and enters the large intestine, a long, coiled organ where most digestion takes place. (page A36)
- _____ 14. In the small intestine, liquids from the pancreas and the liver help to digest fats and carbohydrates. (page A36)
- _____ 15. The small intestine is where water and minerals from food are removed and absorbed into the blood. (page A36)
